BOOK HANDWRITING

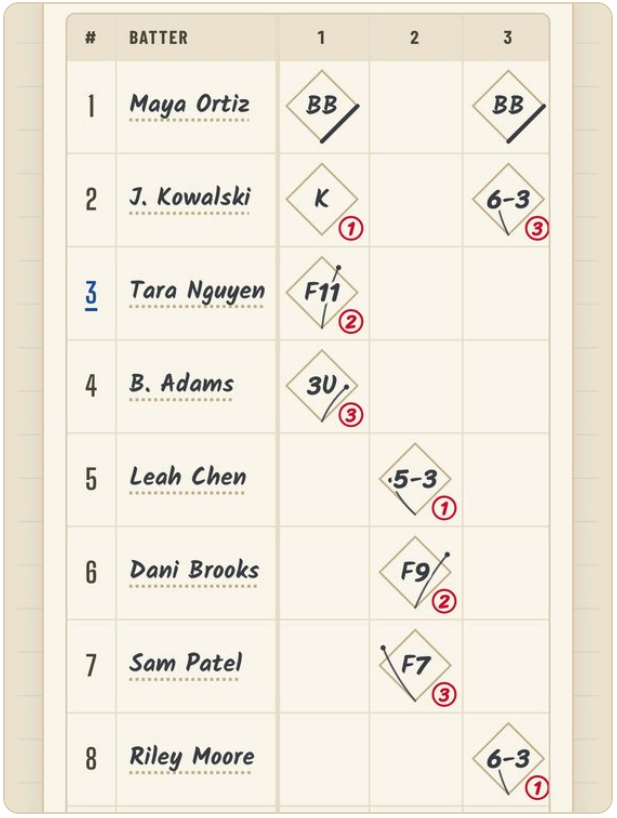

Your two fonts in the real Book, from the sample season on an iPhone 13, next to what the Book uses today. Nothing is committed yet. Pick one and it goes everywhere the Book is handwritten: names, plays, outs, totals, the batter card's boxes, and the Scorecard picture.

TODAY

Kalam letters with Sriracha digits

What the Book uses now: two free web fonts.

BOOK, LIGHT

FELT PEN

Steve 25_110_110

Your felt-pen attempt. Thick and dark, like a marker.

BOOK, LIGHT

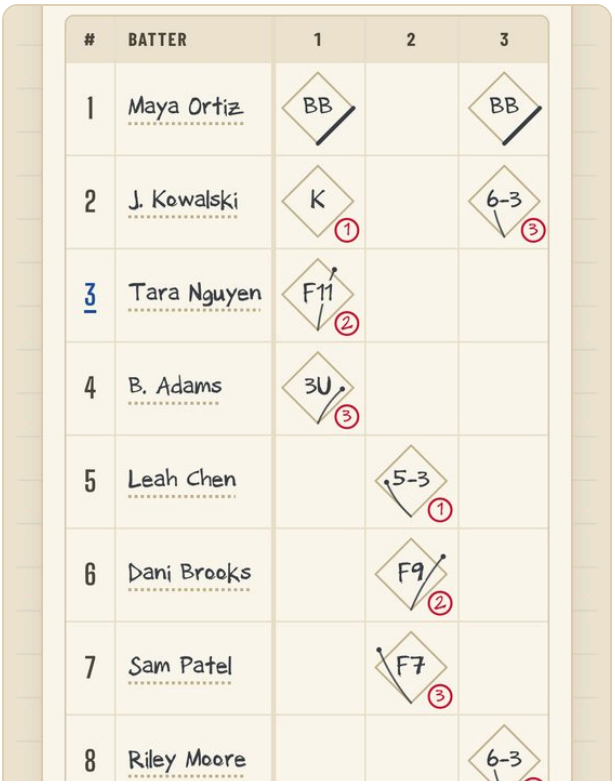

PENCIL

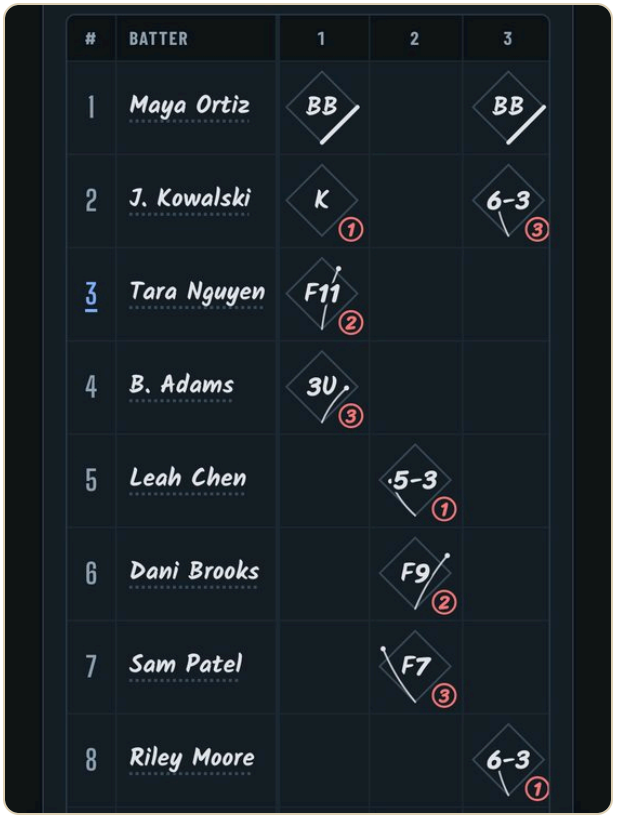

Steve 30_110_110

Your better representation. Thinner, closer to a pencil.

WHAT I NOTICED

- **Both fonts have every letter, number, and mark the Book writes.** A few symbols the Book rarely uses (+, #, &, %) aren't in them, so those fall back to Kalam.
- **Felt pen** reads best at a glance and in sunlight. It's the closest in weight to today's Book.
- **Pencil** looks the most like real handwriting, and its 1 can't be mistaken for an I. It's thinner, so it's a little lighter on the page outdoors. If you like it, I can thicken its lines slightly in the app without changing the letters.
- Each font adds 21 to 32 KB, and both are kept on the device so they work with no signal.
